

User Guide

1.0

Thanks for the purchase!

Help us continue creating new elements for the Create Pack.

Please rate us 5 stars by clicking here.

<https://videohive.net/downloads>

IMPORTANT INFORMATION

Compatibility.

Create Pack is compatible with AE CC2014.2 or higher. Except for templates that use 3D elements, which will only work with AE CC2017 or higher because they require the stable C4D render engine.

Auto Sync Fonts

Create Pack was created using only Adobe Fonts. When you import a template, you will receive a warning if you do not already have the required font synchronized. Just click Sync and Adobe will install the required font. This may take some time, so wait for the complete process to preview the project as it appears in the preview.

Video Tutorial

If you prefer, you can watch the video tutorial with the step-by-step installation of Create Pack here.

[click here to watch online](#)

01 . Download Additional Content.

Step 1.1 | Download ZXP Installer
<https://zxpinstaller.com/>

Step 1.2 | Download Motion Bro Extension
<https://motionbro.net/>

Create Pack requires MotionBro 2.2.4 or higher.
If you already have Motion Bro installed, please check if your version is compatible.

Step 1.3 | Download Free Additional Images here:
https://alohafx.net/createpack_ae/purchasecheck/

Important Warning

Some of the templates will not work perfectly without downloading these additional images.

Your purchase will be checked through Envato Api, before you have access to the restricted download area.

02 . Install Motion Bro Extension

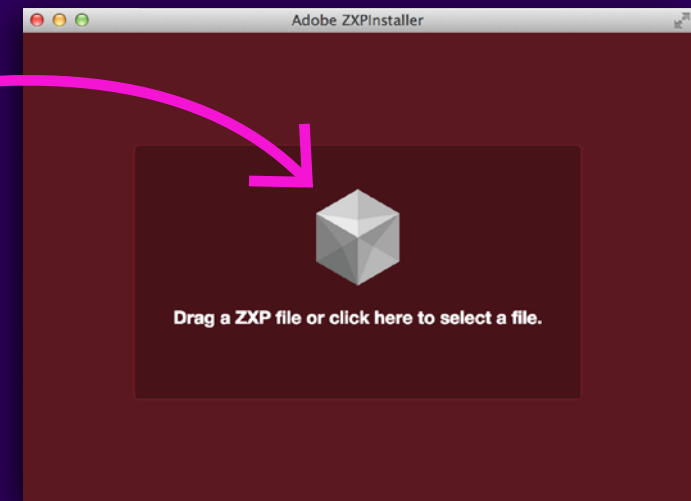

Step 2.1 Quit all Adobe Applications.

Step 2.2  Install and Run ZXP Installer.

Step 2.3 Drag MotionBro.zxp into ZXPInstaller window.

Create Pack requires MotionBro 2.2.4 or higher.

If you can not drag. Click the ZXPInstaller center icon and select the MotionBro.zxp file manually.

03 . Update additional images folder

Step 3.1

Extract the (additional images).zip

You downloaded at https://alohafx.net/createpack_ae/purchasecheck/

Step 3.2

Extract your Envato Files.

You can extract the content of the Create Pack that you downloaded from the videohive to the location of your choice, including external disks. Find the location where you extracted the Create Pack files.

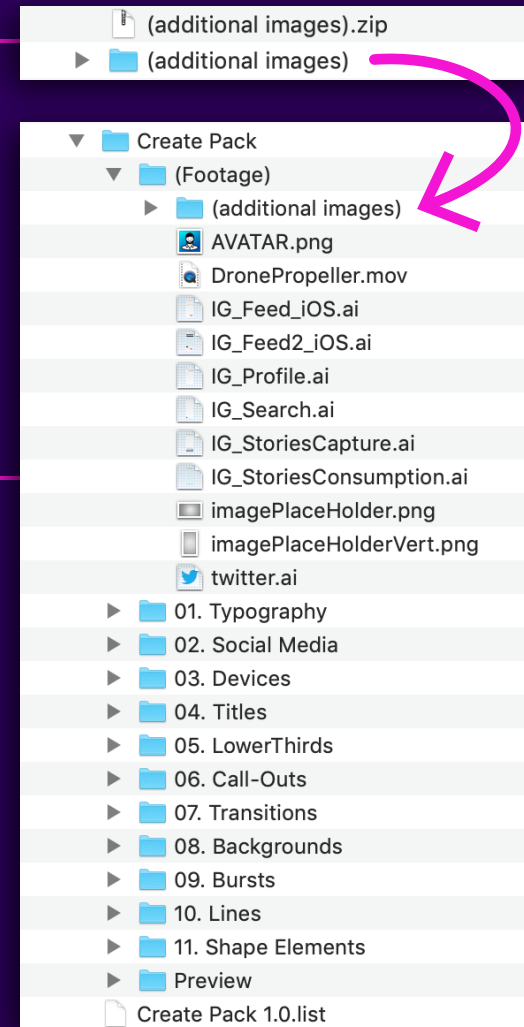

You will see a folder structure like this.

Step 3.3

Replace (additional images) folder

Replace the old folder completely with the new one as shown in the image on the right.

If you skip this step, you will notice that some templates will be displayed with the message: Additional Download required.

New (additional images) from AlohaFX

This original folder needs to be completely replaced with the new one you downloaded from AlohaFx.

The content just seems to be exactly the same, but the new folder contains the correct images for the perfect working of all Create Pack templates.

Make sure you have replaced correctly to avoid incomplete templates.

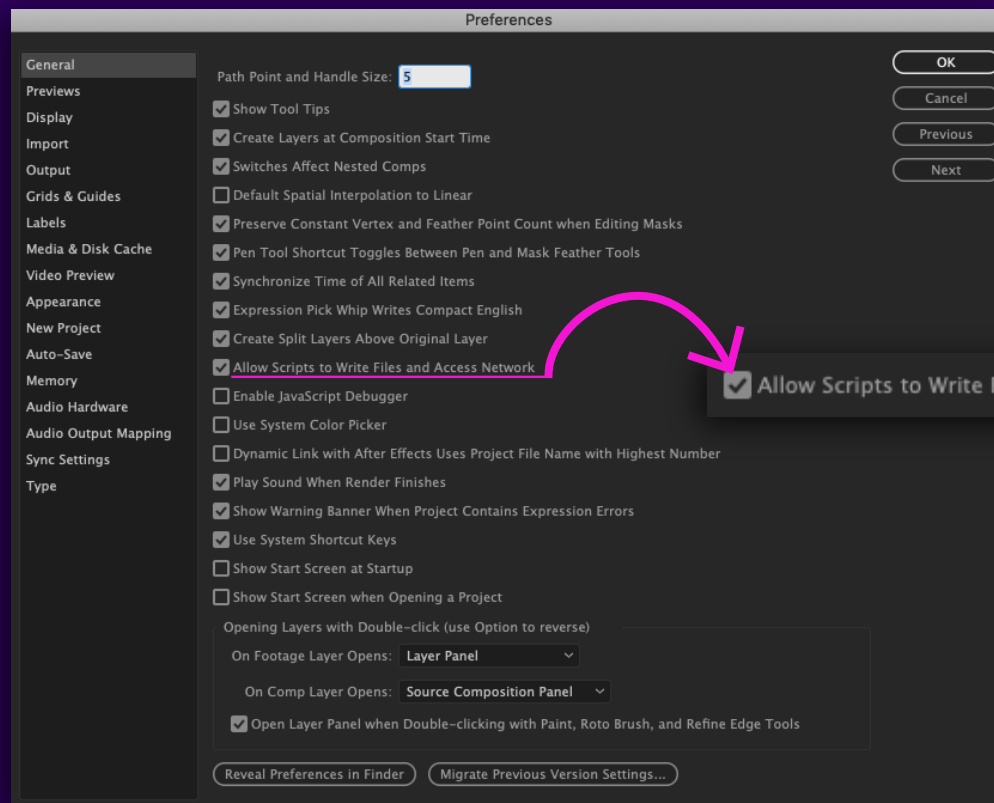

04 . Load Create Pack on Motion Bro

Step 4.1 - If you use After effects CC2019, please ignore this page.

Open After Effects CC2014.2 | CC2015 | CC2017 | CC2018

Go to Preferences / General

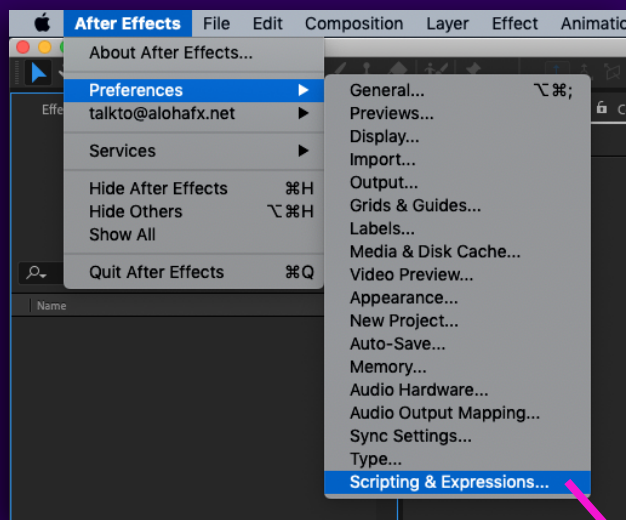

This option must be enabled to proceed with installation.

04 . Load Create Pack on Motion Bro

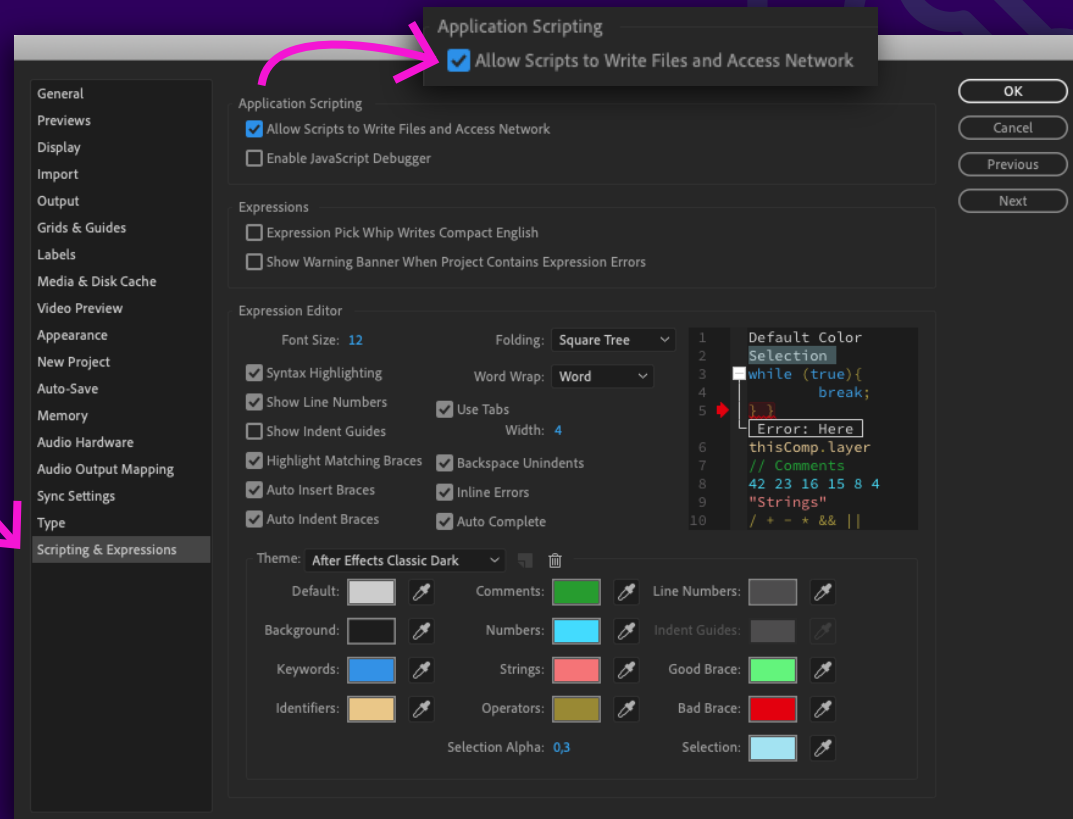

Step 4.1b - After effects CC2019 or higher only.

Open After Effects CC2019 or higher.

Go to Preferences / Scripting & Expressions

This option must be enabled to proceed with installation.

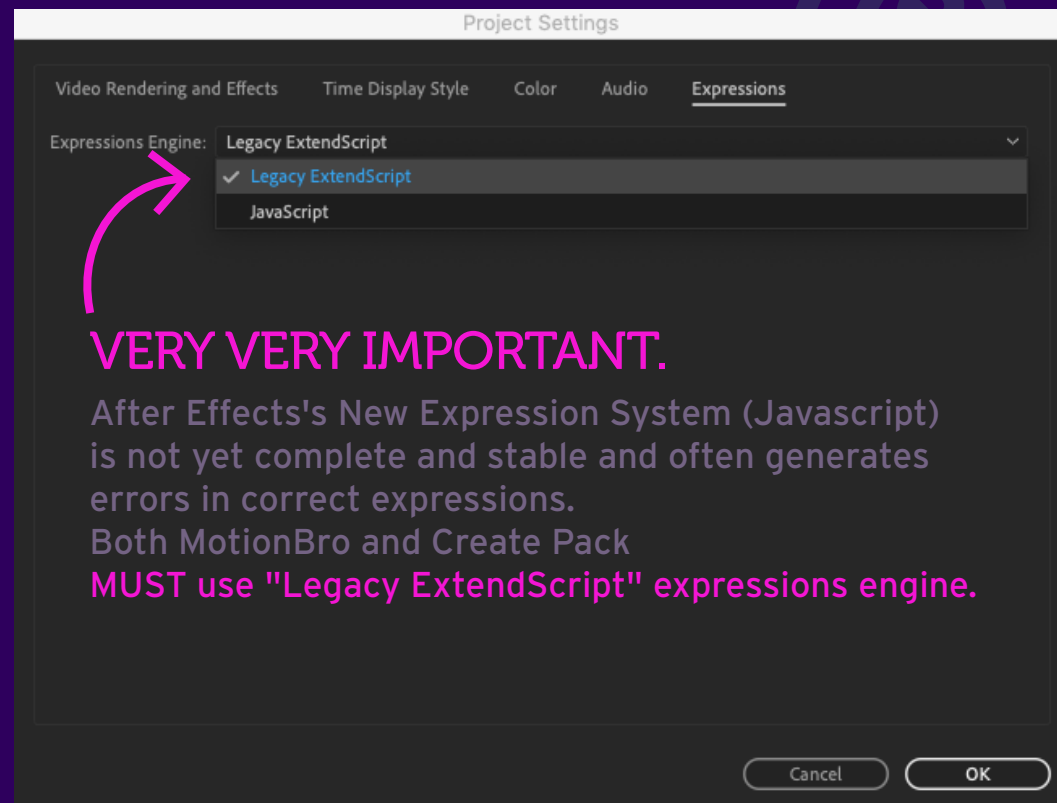

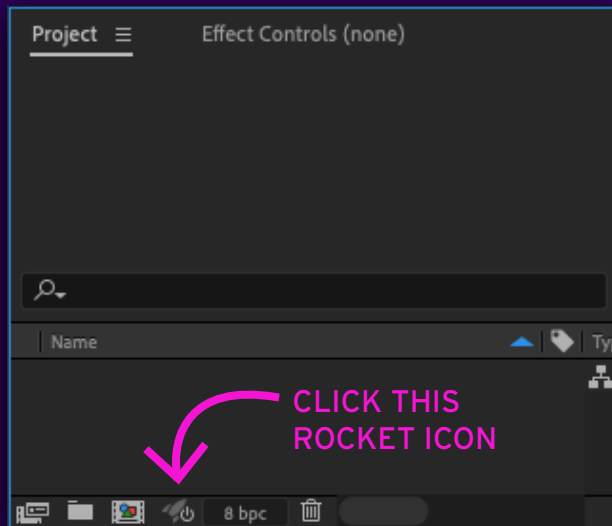

04 . Load Create Pack on Motion Bro

Step 4.1c - After effects CC2019 or higher only.

Open After Effects CC2019 or higher

In your project window there is a new rocket icon. Click on it.

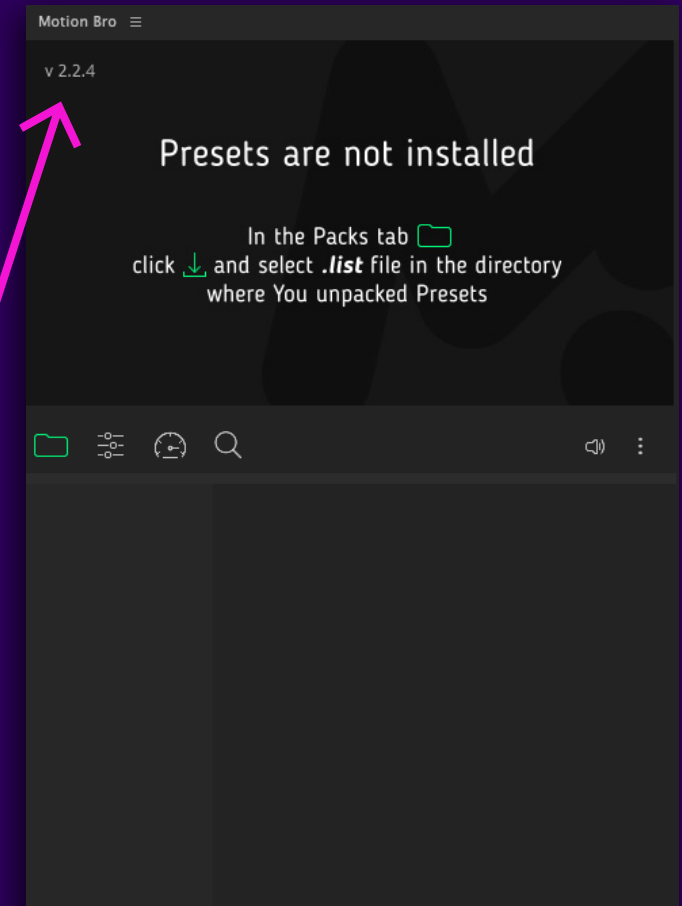

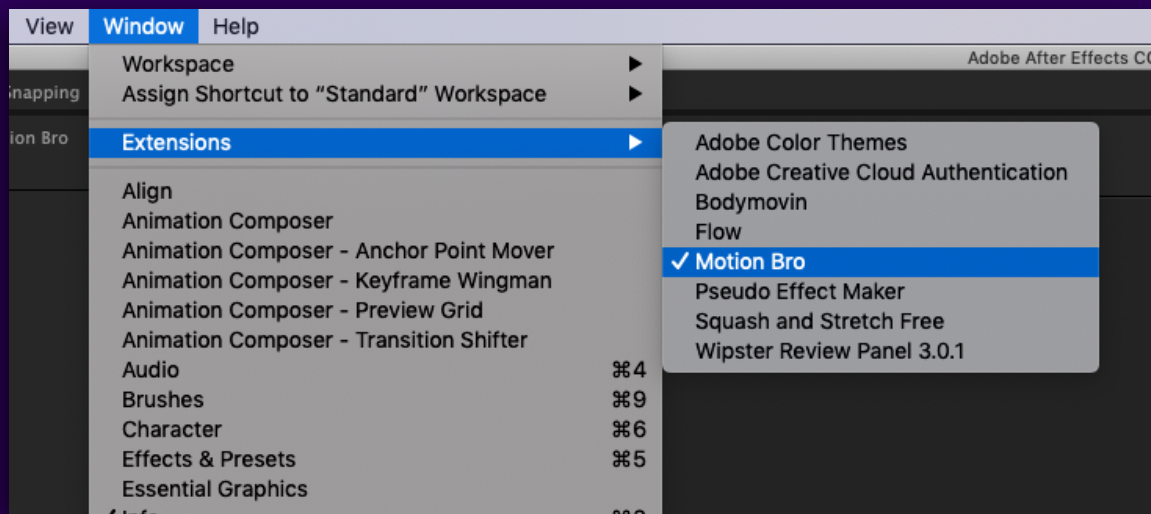

04 . Load Create Pack on Motion Bro

Step 4.2

Open Motion Bro Extension

Go to Menu: Window / Extensions / Motion Bro

Motion Bro extension will pop-up on your screen.
This is a dockable window, you can dock it anywhere in your AE interface.

04 . Load Create Pack on Motion Bro

Step 4.3

Click the green folder icon on Motion Bro.

Step 4.4

Click the Arrow Down Icon.

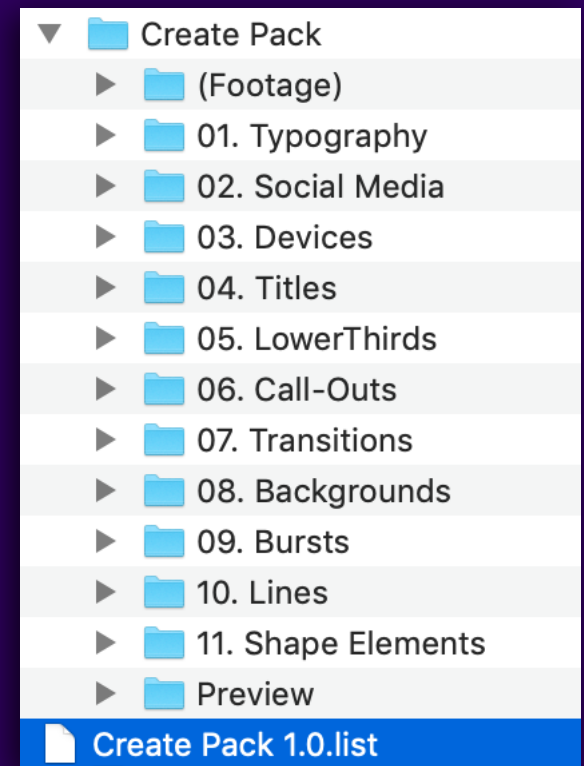

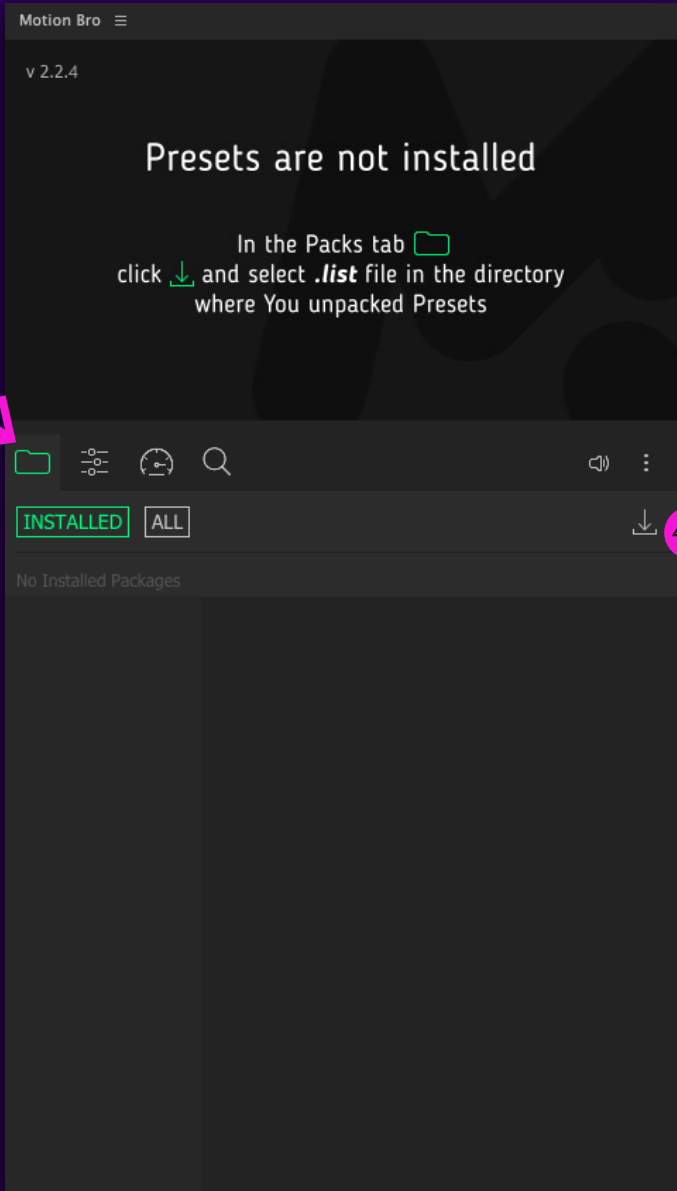

A new window will pop-up.

Please go to the place where you extracted the files you downloaded from VideoHive.

Select the "Create Pack 1.0.list" File.

4.3

4.4

The "Create Pack 1.0.list" file must be on the same level as the "Create Pack" folder. (Never inside or within another folder structure)

05 . Validate Your Purchase Code

Step 5.1

Click the "Get Purchase Code" button.

Your download page will open, on the site [videohive.net](https://www.videohive.net).

5.1

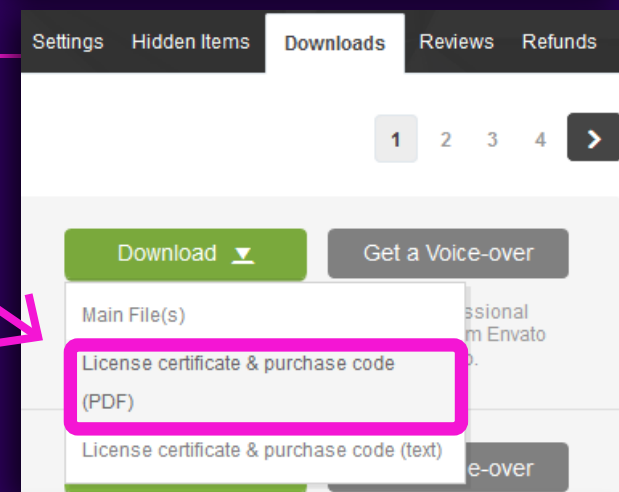

Step 5.2

Download License Certificate

Find the Create Pack, click "Download" and select one file with license certificate.

If you want to help us grow more and more this Pack. It is in this same page that you can rate us 5 stars, if you have not already done so. It's something quick and simple, but it makes a big difference to our evolution. Thank you very much.

5.2

Step 5.3

Paste you Purchase Code and Click Check!

If you paste the code correctly, your Create Pack is ready for use.

5.3

06 . Create Pack Structure

Preview window

Place your mouse over any thumbnail and this window will show you an animated preview of the Element to be imported.

Categories

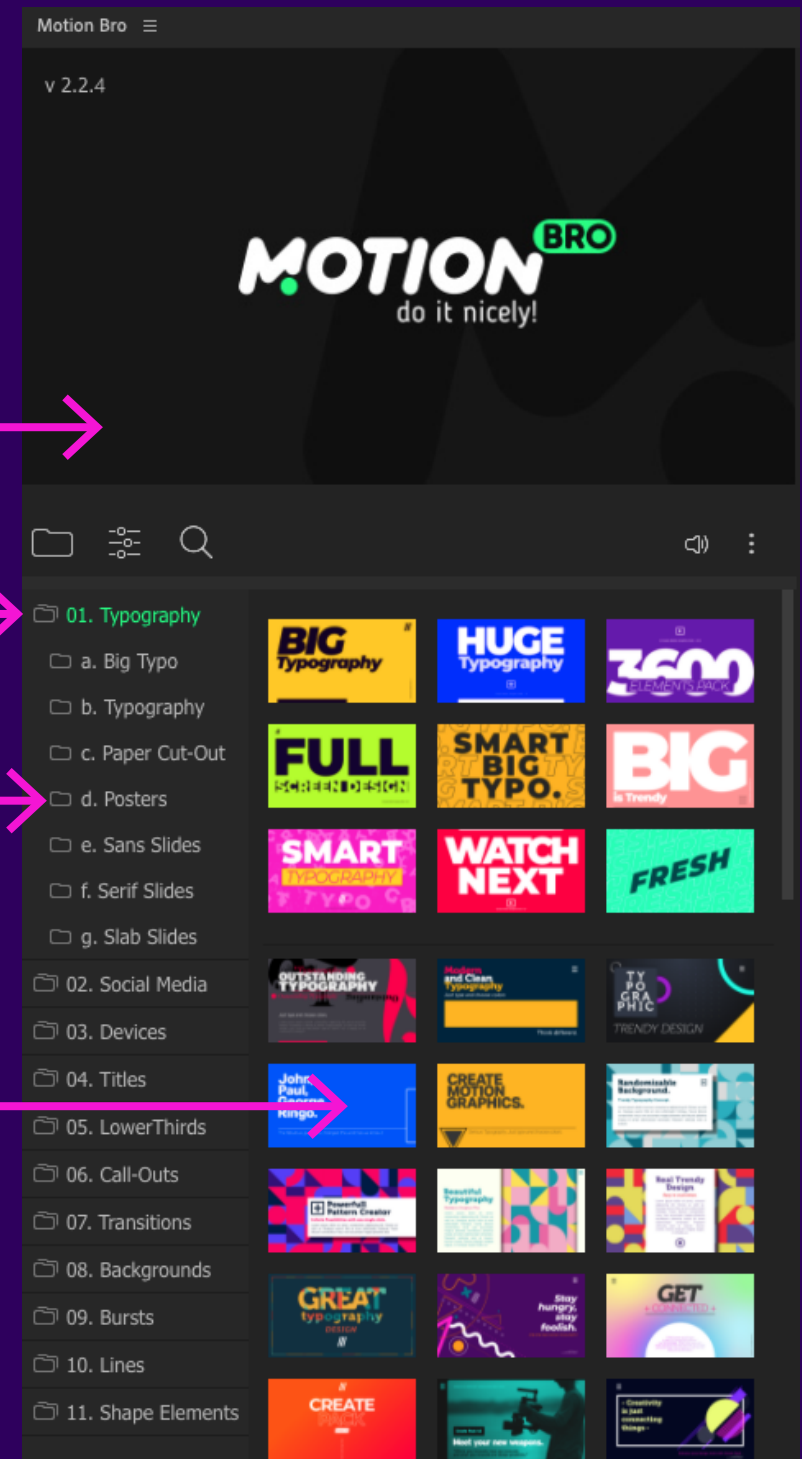

Create Pack is organized by categories in a simple and intuitive way.

SubCategories

So that you do not get lost in the middle of so many options, some categories have subcategories for you to create in the easiest way possible.

One Click to Add

Select your Active Comp and click on the chosen thumbnail. The file will be imported and automatically adjusted to the size of your Active Comp. Easypeasy!
